Checklist of Microform

(Research Collections, Newspapers and Dissertations)

ProQuest®

Table of Contents

About This Checklist

The Turkey Checklist of ProQuest® Microform contains 6 research collections and over 40 serials. Inside you will find titles pertaining to Literature, Anthropology and Human Rights. This checklist also contains information about how to obtain Dissertations.

The checklist will be of particular interest to historians, anthropologists and researchers studying local communities.

One pivotal collection from the checklist is *Human Relations Area Files (HRAF)*. As an internationally recognized organization in the field of cultural anthropology, HRAF provides information that facilitates the cross-cultural study of human behavior, society and culture. The collection contains information on the Turkish and beyond. For those of you looking to enhance your serials on microform, *Turkish Daily News* from Ankara would make an excellent addition to any library. This paper features world news, but also gives extensive coverage to local news.

This preface provides a glimpse into the contents of the Turkey Checklist of ProQuest® microform. Feel free to browse through our titles, or if you are looking for a particular title, please consult the table of contents in the front. If you have any questions regarding our titles, please contact your ProQuest representative at umisalesinfo@proquest.com, 800.521.0600 ext. 2793 or 734.761.0600 ext. 2793.

If you would like additional copies of this or any of our ProQuest® microform catalogs/checklists, you may either make photocopies of the catalogs or contact your ProQuest Sales Representative to have printed copies mailed directly to you.

The Advantages of Microform

Despite the continually developing array of digital technologies—and sometimes because of it—information professionals at libraries and universities worldwide still rely on microform. They know it is an archival medium that will meet the needs of researchers for years to come. Microform provides many advantages including:

- **New Viewer/Scanners** - Images can now be easily sent to remote locations using microform viewer/scanners, which link to your computer workstations, letting you view and print articles or digitize and transmit them electronically (within Fair Use guidelines). This approach combines the unparalleled preservation and storage benefits of microform with the speed and ease of electronic access.

- **Special Collections** - Microform is the answer if you need hard-to-find or specialty resources. Many older newspapers and periodicals are available only in microform, and it gives your users access to complete page images from historical titles—often from the first issue forward.

- **Space Savings** - Microform lets you store an extensive collection of complete article images in a small amount of space. Microform takes up less than one-tenth the area of bound copies of newspapers and periodicals.

- **Ownership** - There is no upkeep or access fees. It uses stable, proven technology you already have, with no need for new workstations or continual software upgrades.

- **Clarity and Accuracy** - Microform is the answer if you need cover-to-cover clarity and accuracy. Full-image articles are essential to getting the full story.

- **Complete Collection** - Microform usually is the best solution if you need a complete collection fast. Maybe you're seeking accreditation or even rebuilding after a disaster. An extensive, customized collection of retrospective and current microform titles will meet the needs of your researchers quickly and efficiently.

- **Support for Specialized Studies** – A compact collection in microform will meet specialized research needs and still leave plenty of resources for the rest of your population. Many libraries also use microform as an added point of access for content that is most in demand.

- **Durability** - archived properly, it can last for generations, and there is no degradation of images.

- **ProQuest Quality** - ProQuest's microform images are taken directly from the original printed pages, so you always get the clarity of first-generation copies.

ProQuest Microform is the answer because we've been producing it since 1938. We not only exceed industry standards, we set them. Our microform products include thousands of newspapers and periodicals, and hundreds of research collections, many of which are not available from any other source.

Research Collections

(Organized Alphabetically)

Books in Languages of Minority Groups of the FSU

The collection contains books of the following languages:

- Aleut; 25 fiche
- Altai; 25 fiche
- Assyrian Neo Aramaic; 16 fiche
- Chukot (Luoravetlan); 20 fiche
- Crimean Tatar (Crimean Turkish); 12 fiche

Card Catalog of the Department of the Literature of the Nationalities of the Former Soviet Union, from the National Library of Russia, St. Petersburg

The Department of the Literature of the Nationalities of the FSU holds the largest collection in the world of published materials of the numerous nationalities of the FSU. The collection, begun more than two centuries ago, today contains more than 1.5 million items, including first editions of books and periodicals in nearly 90 languages. The collection also contains publications in the same languages printed all over the world, but mainly in Western Europe. Among those are books in Armenian and Georgian from the 17th and 18th centuries published in Rome, Paris, Amsterdam, Constantinople and Venice. All these works have been cataloged in the card file which is now available on microfiche. The biggest sections are in the Armenian, Uzbek, Georgian and Azerbaijani languages. Following are the languages of the various nationalities in which the books and periodicals were written and which comprise this card catalog:

- Abazinskii, **2 fiche**
- Abkhazskii, **5 fiche**
- Avarskii, **6 fiche**
- Adygeiskii, **6 fiche**
- Azerbaidzhanskii, **107 fiche**

HRAF: Human Relations Area Files

Human Relations Area Files, Inc. (HRAF) is an internationally recognized organization in the field of cultural anthropology. Established as a not-for-profit membership consortium of universities, colleges and research institutions, HRAF's mission is to provide information that facilitates the cross-cultural study of human behavior, society and culture. HRAF grew out of work in the 1930s by behavioral scientists at the Yale University Institute of Human Relations who began development of a classification scheme for cultural information by subject. The Human Relations Area Files was incorporated in 1949 with Harvard University, the University of Oklahoma, the University of Pennsylvania, the University of Washington and Yale University as its founding members. These five were joined within the year by the University of Chicago, the University of North Carolina and the University of Southern California. Some 300 colleges, universities, libraries, museums and research institutions in the United States and 25 other countries are now Associate or Sponsoring Members.

HRAF is a financially independent research agency of Yale University in New Haven, Connecticut. Since World War II, the growing concern of students, scholars and the general public around the world to understand ethnic conflict, cultural diversity and global problems has generated a demand for educational and research programs emphasizing the worldwide, comparative study of human behavior and society. The development of cross-cultural and area studies requires an extensive body of readily available organized cultural information. Scattered among myriad journals, dissertations and fieldwork studies and across numerous disciplines, conventional sources of such information are often inaccessible, expensive and difficult to utilize effectively. The HRAF collections are specifically designed to lessen these barriers to cross-cultural research.

Only members of HRAF can acquire access to HRAF collections. Thus individuals or institutions (colleges, universities, public libraries, museums, high schools, etc.) must first become members of the HRAF consortium before they can acquire microfiche. All applicants must be approved by the Board of HRAF. However, virtually all applicants are accepted.

Please inquire for additional information

- **Selected Sample File Set**
  HRAF has created the Selected Sample File Set (also known as the Probability Sample Files), a specially selected group of 60 representative cultures from around the word, to enable global comparative studies when an institution is not able to acquire the complete collection. The materials in these files touch upon virtually all of the areas of social and cultural life of most interest to scholars and students. Each of the cultures in the Sample Set represents a different cultural area.
  - Asia – Andamans, Chukchee, Garo, Iban, Ifugao, Khasi, Korea, Santal, Sinhalese, Taiwan Hokkien, Tailand, Toraja (Eastern Toraja), Yakut

- **Central Asia**
  - Turkestan – General and Turkic Peoples

Human Rights Watch Publications
1980 - 2008

Founded in 1978, Human Rights Watch is dedicated to protecting the rights of individuals worldwide. The organization conducts regular, systematic investigations of human rights abuses in approximately 70 countries and produces a wealth of timely publications documenting these crimes. Since it began publishing reports in 1980, Human Rights Watch has produced more than 1,200 publications, covering over 100 countries and ranging from 6-page, country-specific investigations to the comprehensive Human Rights Watch Annual Report and longer reports of 900 pages. All of these publications are now available on microfiche. The HRW microfiche collection is available on a year-of-publication basis.
Human Rights Watch publications contain information not available from any other source, covering many of the most significant issues of our times. They are relied upon by citizens' organizations, policymakers, the press, the academic community and concerned individuals worldwide. Libraries and their patrons will find the microfiche edition of the Human Rights Watch 1980–2008 publications to be an invaluable resource.

Ongoing supplements will be added to the *Alternative Press* collection on a yearly basis.

UMI Dissertation Publishing

Soon after its founding in 1938, UMI became the publisher of record for U.S. doctoral dissertations. To this day, ProQuest fills that role for graduate students whose dissertations and masters theses have been accepted by accredited institutions throughout North America.

How UMI's Dissertation Program Works

Dissertations and theses available from ProQuest /UMI are used by researchers in all fields of study. The ProQuest /UMI dissertation product line – which consists of bibliographic data, indexing, access tools and the published documents themselves – is recognized worldwide because of its comprehensive coverage, high-quality information and rigorous editorial control.

The online ProQuest Dissertation & Theses Database (PQDT) catalogs over 2 million doctoral dissertations and master's theses, dating from the first U.S. dissertation in 1861. Thousands more are added yearly. Over one million dissertations and theses are available in full page image in microform and paper, both bound and unbound. Many are also available in digital format, for downloading over the Web. Dissertations can be located and ordered on a standing order basis or via:

- ProQuest Dissertations & Theses, which provides searching capabilities and online access to citations and abstracts for every title in the database. Titles published since 1997 are available in .PDF digital format and have citation and abstract, plus 24 page previews available. Dissertations can be purchased in print, microfiche or .pdf format.

- ProQuest Dissertation Express for both individuals and libraries. If you have a specific title in mind, Dissertation Express will let you look it up by title, author or publication number. Once you find it, you can place your order immediately via our online ordering system. Use this service when you know exactly which dissertation you need to order. Dissertations can be purchased in print, microfiche or .pdf format.

- DATRIX Direct – custom computerized search service (please see the DATRIX form enclosed in this document). This is an individualized search we perform for you based on your specific research topic.

- UMI Digital Archiving and Access Program - Ask your UMI representative about this new access and preservation service for institutions.

DATRIX DIRECT

Direct to you Successful research depends on your sources. That's why if you're preparing to start a research project, it makes sense to first find out what's been written in your area of interest. You'll not only avoid duplicating someone else's work, you'll benefit from their research. | You could search the titles of over 1.6 million dissertations and master's theses yourself—if you have the time and patience. Or you can have DATRIX Direct conduct a dissertation search for you that's exhaustive, not exhausting.

UMI

Discover sources unique to your topic DATRIX Direct is an individualized search that gives a one-of-a-kind listing of only those dissertation citations directly relevant to your specific research topic. The result is a computer printout of exactly the bibliographic citations you need. No more and no less. It could be as many as five hundred or as few as none (informing you that your research topic is totally unexplored).

Because it's a computerized search, DATRIX Direct is comprehensive—through UMI's vast computer database of over 1.6 million dissertations and master's theses dating back to 1861. And with thousands of citations being added to the database every month, DATRIX Direct is more up-to-date than any printed source. ■ Each citation includes a title, author, degree, date, institution, subject category, and order number, as well as where the abstract can be found in UMI's monthly publication *Dissertation Abstracts International* or the bi monthly *Masters Abstracts International.*

How to order your search To organize your search, complete both sides of the DATRIX Direct Search Request form and send it to UMI at the address shown. ■

The results of your DATRIX Direct search will be sent first-class mail and should arrive within two weeks of receipt of your order. For faster service, call us toll free at 800-521-3042; outside the U.S. and Canada, call 734-761-4700, ext. 7044.

SUBJECT CATEGORIES
Dissertation Abstracts International is arranged by subject categories. These categories have been selected by the authors to identify their dissertations.

Titles with an asterisk * may require additional delivery time

You must COMPLETE BOTH SIDES of this form!

DATRIX DIRECT SEARCH REQUEST
The success of your search depends on how accurately and specifically you describe your research needs. The information you provide below will help us create a search strategy. Please type or clearly print in ink.

RESEARCH TOPIC   Write the proposed title of your study or a summary of your research topic _____

_____

DATABASE MATERIAL TO BE SEARCHED *(Please check one.)*   ○ Dissertations & master's theses   ○ Dissertations only   ○ Master's theses only

KEYWORDS   UMI's dissertation database is accessed by a search for keywords in the dissertation title. The number of relevant citations retrieved depends largely on your keyword strategy. *For best results, follow the procedure below:*

❶ Write 1 to 3 keywords from your research topic that might appear together in the dissertation titles in our database (e.g., "Nursing Burnout"). A keyword can also be numeric ("1980") or alphanumeric ("B12"). Only dissertation titles containing all the words you list on a single line can be retrieved.

❷ To avoid having to list all possible word endings for a keyword, simply write the root word and an asterisk. One or more complete words must follow the root word on the same line (e.g., "Nurs*, Burnout" would search for words such as "nurse, nurses, and nursing" which appear in the same titles as "burnout").

❸ Use the other lines for synonyms and alternate words and spellings (e.g., "RN; LPN; BSN").

❹ Modify words likely to appear in hundreds of titles with more specific words.

❺ If appropriate, use the right-hand column to list keywords that exclude data you don't want. (e.g., "Nurs*, Home" and "Nurs*, Homes" would exclude titles relating to nursing homes or home nursing. Note that the computer recognizes no word order.)

SUBJECT CATEGORIES *(optional)*   Each citation title is listed in UMI's dissertation database in a subject category chosen by the author. On the opposite page is a complete listing of subject categories and codes. List the categories (and codes) most relevant to your research topic.

CODE   CATEGORY

_____

_____

_____

_____

_____

DEGREE DATES *(optional)*   You may narrow the database search to certain years or time periods (e.g., "1980 through 1983"). This is especially recommended for broad categories such as "Education, Administrative", for which nearly 1,200 titles are added each year.

_____

_____

INSTITUTIONS AWARDING DEGREES *(optional)*   You may restrict the search to dissertations and master's theses prepared for specific institutions (e.g., "New York University and UCLA").
