ProQuest Interdisciplinary Resources

At ProQuest, we're focused on enabling the best outcomes for the time users invest in their research. We know that every improvement we make in their workflow frees users to spend more time on their core mission. That often means conquering barriers between them and the rich diversity of content they require.

Researchers tell us that missing relevant research literature is their number one worry, so we dig deep to understand their requirements. We know that…

- **They need books—print and e:** Researchers often need to explore deeper than a journal article allows. Books add extra layers of context and detail to give a more comprehensive understanding of a topic.

- **They want working papers and conference proceedings:** The peer review process can take up to two or three years. Researchers use working papers and conference proceedings to see the latest thinking first, with the same articles often turning up years later in peer-reviewed journals.

- **They want breaking news:** Interesting and topical research gets published virtually every day. Researchers rely on current news sources to stay up to date, ensuring their research remains relevant.

Scholarly journals remain a priority and ProQuest's longstanding partnerships with premier publishers ensures access to the best quality, but we don't stop there. ProQuest's databases buoy scholarly journal articles with the mix of content faculty and students demand—monographs, working papers, conference proceedings, reports, data, newspapers.

Expertly indexed and organized, ProQuest's databases empower researchers to go further, faster.

Table of contents

"ProQuest (Central) now is being extensively used, it is a multi-disciplinary database and caters to a wide area of subjects...our user statistics depict a higher usage after subscribing to ProQuest"

Ms. Shobita Kohli
Library Director at
A.M.AL-Refai Library,
Gulf University for Science
and Technology

ProQuest

ProQuest Central

The most comprehensive, diverse, and relevant multidisciplinary research database available

PROQUEST CENTRAL BRINGS together many of our most used databases across all subject areas to create an incredibly broad and comprehensive content set.

Multi-Disciplinary. ProQuest Central offers great value by including databases in business, health and medical, social sciences, education, science and technology, as well as core titles in the Performing and Visual arts, History, Religion, Philosophy, and Language and Literature.

Key Titles, Diverse Content. The collection provides access to not only scholarly journals, but also to high value market research, country, economic, and industry reports, essential pre-print working papers, and full-text dissertations, as well as a vast number of professional journals, and general interest periodicals. It also includes over 2,300 full-text news sources from all over the world, which provide context to the extraordinary scholarly content in ProQuest Central.

Discoverability. As content is only valuable if it is discoverable, the collection is presented on the ProQuest platform and its titles are discoverable through The Summon® Service from ProQuest, OCLC WorldCat, Ex Libris Primo Central, PubMed and Google Scholar (when enabled). Plus, through the ebooks tab on the ProQuest results page, researchers can cross search their organization's ProQuest ebook holdings (when available) alongside their ProQuest platform database content.

Best Interface. Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards. In addition, novice and experienced researchers benefit from robust information management and workflow tools and functionality integrated into the platform, including the ability to cite results in numerous citation styles, save as a PDF or other document formats, save searches, and export documents to reference management tools like RefWorks.

Why ProQuest Central?

The latest scholarly journals, the most important publishers. Read the latest full text of key journals including the *Lancet, Nature, Science, New England Journals of Medicine,* and *Journal of International Business Studies*. Find the world's most important scholarly publishers including Cambridge University Press, Springer, and Emerald.

Comprehensive, expert, global market information. An unrivalled collection of expert analyses of industries, countries, economies, and markets from Business Monitor International, Euromonitor, Economist Intelligence Unit (EIU), ISI Emerging Markets, Oxford Analytica, Oxford Economics, and more.

The latest news. Local, regional, and international news coverage including the *Wall Street Journal, Australian Financial Review,* the *Times of India, Financial Times, Le Monde,* and *The Guardian*.

The most influential business and current affairs magazines. Keep up to date with current full text of the most widely read magazines including *The Economist, New Statesman, Billboard,* and *The New Yorker.*

Cutting-edge thinking. See the latest academic thinking first by accessing more than 450,000 working papers from NBER, RePec, INSEAD, and OECD.

Dig deep into the data. Explore 50 years' worth of actual and forecasted economic data for the G20 countries from Economist Intelligence Unit. Features hundreds of variables and key indicators all downloadable in MS Excel.

Comprehensively review the relevant literature. Find even more relevant academic thought and conduct a more thorough literature review by searching over 75,000 full-text dissertations each with extensive references and literature reviews.

Complete health and medical coverage. Users can access the key medical journals, practical guidance and in-depth coverage in conference proceedings and working papers, as well as hundreds of health, psychology and nursing videos and thousands of dissertations.

ProQuest Central Offers:

- Great return on investment, eliminating the need for multiple databases from multiple vendors to cover core disciplines.
- Balanced coverage of academic, trade, and news content with access to millions of full-text articles from thousands of scholarly journals.
- Unique content **not** available from any other vendor, all available through one search with the ability to be searched separately using specialized fields.
- Value is added to the content through the renowned ProQuest specialized vocabulary and indexing.

ProQuest Central contains:

International Newsstream	Criminal Justice Database	Arts & Humanities Database
Canadian Newsstream	Education Database	Research Library
US Newsstream	Library Science Database	Australia & New Zealand Database
Biology Database	Linguistics Database	Continental Europe Database

ProQuest® Dissertations & Theses Global

Official dissertations repository for the Library of Congress and critical scholarly content

THE LARGEST DATABASE of electronic theses and dissertations available worldwide, ProQuest Dissertations & Theses Global includes 4 million works from more than 3,000 universities all over the world. More than 120,000 works are added annually through an ever-expanding network of global university partners.

ProQuest Dissertations & Theses Global offers an extensive and expanding global collection of dissertations and theses, an important and valuable tool for the university and the researcher in all areas of scholarship. Institutions can transform the library's dissertations and theses, make institutional research globally discoverable from trusted databases, and provide on-demand use to authoritative information. Direct, immediate access to full-text graduate works saves time and money by reducing resources required to secure graduate works through inter-library loan.

For the researcher, deep coverage and extensive bibliographies uncover sources and ideas that would otherwise be missed. Fast and seamless access to nearly 2 million full-text works and cross-referenced access to scholarly content across the library's online service enhances the research experience.

Why ProQuest Dissertations & Theses?

Dissertations and theses are essential to scholarship throughout the university. Working with ProQuest, institutions can transform the library's dissertations and theses, make institutional research globally discoverable from trusted databases, and provide on-demand use to authoritative information.

- Dissertations are a crucial form of scholarly communication.
- Dissertations provide great sources for specific areas of research.
- Dissertations are scholarly works based on original research.
- Dissertations test and present new ideas and trends.
- Dissertations contain data and results of lab experiments, fieldwork, surveys, and statistics that are often the basis of journal articles—details journal articles often don't include.
- Dissertations provide valuable context for learning about faculty, institutions, and fellow scholars.

For the researcher, deep coverage and extensive bibliographies uncover sources and ideas that would otherwise be missed. Fast and seamless access to nearly 2 million full-text works and cross-referenced access to scholarly content across the library's online service enhances the research experience in a variety of ways:

- **Ideas:** uncover the research history of a topic and seek niches for further research.
- **Literature reviews:** PhD theses contain a full literature review of the research within the topic area.
- **Latest research:** Graduate works feature the latest trends and most up-to-date topic overviews.
- **Depth:** PhD theses are often more detailed than journal articles.
- **Unique content:** Many niche humanities and history theses, for example, may be the only literature on the topic.
- **Structure:** Find examples of abstracts, how to structure an argument, and how to document research.

Awards and Product Reviews

- Official dissertations repository for United States Library of Congress
- Database of record for graduate research, American Research Libraries
- More than 2 million full-text PDFs from 3,000 schools
- 120,000 new works added each year

Research Library

The starting point for research: key titles and diverse, international content across 150 subjects

RESEARCH LIBRARY SOLVES a common library problem: where to begin with a research problem or topic search. It provides a diverse, international mix of scholarly, professional, and consumer periodicals that cover a broad but reasonable set of content in over 150 subjects. Updated daily with fresh content, it also has a very deep backfile for context and provides the renowned ProQuest vocabulary and indexing together with a user-friendly interface.

Key titles. Unlike other multidisciplinary periodical databases, Research Library includes high value titles such as *The Economist, The Lancet, the New England Journal of Medicine,* and Nature Publishing titles. Research Library provides great value as its content grows yearly.

Broad coverage. Research Library provides an international mix of scholarly, professional, trade, and consumer titles that cover over 150 subjects, including business, the sciences, education, literature, the arts, medical, and social sciences. Expanding daily, Research Library currently includes more than 6,200 titles with more than 4,650 of those titles in full text and more than 3,000 in ongoing full text.

Diverse content. It features a highly-respected, diversified mix of scholarly journals, trade publications, magazines, and other content, such as the White House Briefings, White House Press Releases, and respected blogs. Research Library covers more subject areas than other general reference resources, making it useful for serving the diverse needs of both one-time and serious research inquiries. It covers the top 150 core academic subject reference areas extensively, making it not only an invaluable database for a number of academic disciplines but also accessible to readers and researchers at every level.

Why Research Library?

- The starting place for periodical research, covering many subjects and topics.
- The database offers many of ProQuest's top titles together in a common database across many subjects and topics and features government information such as White House Press Briefings alongside other valuable content such as blogs and books.
- Balances diverse academic, professional, and consumer resources - all with deep backfiles
- Renowned ProQuest specialized vocabulary and indexing

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Adviso*r Readers' Choice Awards.

Academic Complete
The foundation of your library's ebook holdings

THE FIRST SUBSCRIPTION of its kind, ProQuest's Academic Complete is the solution for libraries that want to provide faculty and students at all levels with librarian-curated ebooks essential to successful teaching, learning, and research outcomes. Designated as a *CHOICE* Outstanding Academic Title and Best E-book Database by readers of *Library Journal*, this award-winning subscription provides unlimited, multi-user access with no turnaways to a critical mass of scholarly content, totaling approximately 130,000 carefully curated titles spanning key academic subject areas from such publishers as Cambridge University Press, Bloomsbury Publishing, Wiley, Elsevier Science, Princeton University Press, F.A. Davis, and Johns Hopkins University Press.

Highly flexible, Academic Complete is available as a full subscription or as individual subject collections that can be mixed and matched to create a custom solution that fits even the most unique library needs. The individual subject collections available include:

- The Arts
- Business
- Education
- Health & Medicine

- History
- Law
- Literature & Language

- Religion & Philosophy
- Science & Technology
- Social Sciences

This foundational content is offered on a platform that's intuitive to digital natives and simplifies the research process making it easier to discover, evaluate, and access new content. Researchers can find exactly what they are looking for with robust search capabilities, browse by subject functionality, and the ability to narrow search results by filters. Search results by book and chapter display the most relevant results and allow easy navigation to the full-text content. Time-saving tools for note-taking, highlighting, and citing keep researchers in context while reading and reduce disruptions to their work.

Researchers can read online or take advantage of offline reading options including DRM free chapter downloads, and full book downloads. Support for mobile devices is offered via a responsive web design that optimizes heavily used features such as search and download on tablets and smartphones. Librarians can easily access analytics to identify user trends and download usage reports to prove value to library management.

To make it easy to promote Academic Complete's award-winning content, the subscription features the LibraryThing for Libraries™ Book Display Widget™, which subscribers can use to easily create carousels that highlight collections of print and digital books. Easy-to-copy code means no technical expertise is needed to embed customized carousels on library and catalog homepages, subject landing pages, LibGuides, and even on your library's social media platforms.

Why Academic Complete?

- Academic Complete has been carefully curated to focus primarily on scholarly and professional books that are typically purchased by academic libraries, including a large number of *CHOICE* Outstanding Academic Titles.

- Key publishers, including university presses and other academic content providers, are well represented within the collection alongside many of the world's leading trade publishers and smaller, but important, boutique publishers. Librarians can supplement Academic Complete with additional ebooks under purchase, Demand Driven Acquisition (DDA), and Short-Term Loan (STL) models with no additional hosting fee.

- With the recent growth in interdisciplinary degrees, the need to support cross-disciplinary research is growing. Titles are selected by our on-staff librarians to provide coverage of all scholarly disciplines, offering substantial collections of title within core subject areas.

- To make it easy to promote Academic Complete's award-winning content, the subscription features the LibraryThing for Libraries™ Book Display Widget™,, which subscribers can use to easily create carousels that highlight collections of print and digital books. Easy-to-copy code means no technical expertise is needed to embed customized carousels on library and catalog homepages, subject landing pages, LibGuides, and even on your library's social media platforms.

Australia & New Zealand Database
Important regional scholarship

FOR RESEARCHERS IN Australia and New Zealand—or area studies researchers—who need to keep up with the latest scholarship in the region, the Australia & New Zealand Database provides access to scholarly full text of locally published content without the need to search multiple resources.

Local content is highly valued by researchers, making local scholarly journals some of the most used publications in the library. The Australia & New Zealand Database provides ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in Australia and New Zealand. This database provides the latest scholarly publishing from the region covering major subject areas of study, including business, science, technology, engineering, medical, psychology, social sciences, education, arts, literature, history, and others.

Subject areas include:

- Arts
- Business and economics
- Education
- Humanities

- Literature
- Medical
- Psychology
- Science

- Social sciences
- Technology
- Women's studies

Why Australia & New Zealand Database?

- The Australia & New Zealand Database contains over 200 scholarly, current, full-text journals.
- All journals are published in the region by academic institutions and scholarly publishers.
- A truly multidisciplinary database, it covers the most important subjects for study and research in the region, published by scholars working in local higher educational institutions.
- This database simplifies the research process for students and researchers by bringing this valuable local content together in one database, giving them one place to find the latest scholarship in their region.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

To learn more or request a free trial, contact us at www.proquest.com/go/D8659.

Continental Europe Database
Important regional scholarship

FOR RESEARCHERS IN Continental Europe— or area studies researchers—who need to keep up with the latest scholarship in the region, this database provides the current full text of over 300 scholarly journals from the region, making it easy to find local resources without searching multiple resources.

Local content is highly valued by researchers, making local scholarly journals some of the most used publications in the library. The Continental Europe Database is a multidisciplinary collection of ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in the following European countries, with the largest provider listed first: Spain, Germany, France, Italy, Switzerland, Netherlands, Finland, Portugal, Denmark, Greece, Sweden, Austria, Cyprus, Belgium, and Norway.

All major subject areas of study are represented, including business, science, technology, engineering, social sciences, education, and humanities, providing researchers in all fields with access to the latest scholarly articles from their region. The majority of titles have linked, cited references enabled which allow the user to quickly and easily find other relevant literature in the field.

Subject areas include:

- Business and economics
- Humanities
- Medical
- Political science
- Science
- Social sciences
- Technology

Why Continental Europe Database?

- The Continental Europe Database contains over 300 scholarly, current, full-text journals.
- All journals are published in the region by academic institutions and scholarly publishers.
- A truly multidisciplinary database, it covers the most important subjects for study and research in the region, published by scholars working in local higher educational institutions.
- This database simplifies the research process for students and researchers by bringing this valuable local content together in one database, giving them one place to find the latest scholarship in their region.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

To learn more or request a free trial, contact us at www.proquest.com/go/D8659.

East & Central Europe Database

Important regional scholarship

FOR RESEARCHERS IN East and Central Europe—or area studies researchers—who need to keep up with latest scholarship in the region, the East & Central Europe Database provides the current full text of over 600 scholarly journals from the region, providing quick access to locally published scholarly information without the need to search multiple resources.

Local content is highly valued by researchers, making local scholarly journals some of the most used publications in the library. The East & Central Europe Database features ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in the East and Central Europe region. This collection provides the latest scholarly publishing from the region with content published in the following countries, the largest provider first: Romania, Poland, Slovenia, Croatia, Czech Republic, Lithuania, Russian Federation, Slovakia, Hungary, Latvia, Serbia, Estonia, Bosnia and Herzegovina, Ukraine, Bulgaria, Montenegro, Macedonia, Moldova, Albania, and Macedonia.

Major subject areas of study are represented, including business, science, technology, engineering, medical, psychology, social sciences, education, arts, literature, history, and others. The majority of titles have linked cited references enabled which allow the user to quickly and easily find other relevant literature in the field.

Subject areas include:

- Arts
- Business
- Economics
- Education
- Humanities

- Law
- Linguistics
- Literature
- Medical

- Psychology
- Science
- Social sciences
- Technology

Why East & Central Europe Database?

- The East & Central Europe Database contains over 600 scholarly, current, full-text journals.
- All journals are published in the region by academic institutions and scholarly publishers.
- A truly multidisciplinary database, it covers the most important subjects for study and research in the region, published by scholars working in local higher educational institutions.
- This database simplifies the research process for students and researchers by bringing this valuable local content together in one database, giving them one place to find the latest scholarship in their region.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

India Database
Important regional scholarship

FOR RESEARCHERS IN India—or area studies researchers—who need to keep up with latest scholarship in the region, the India Database provides the current full text of over 400 scholarly journals published in or relating to India, providing access to locally published content without the need to search multiple resources.

Local content is highly valued by researchers, making local scholarly journals some of the most used publications in the library. The India Database provides ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in India. Major subject areas of study are represented, including business, medical, science, technology, engineering, and social sciences.

Subject areas include:

- Business and economics
- Engineering
- Medical
- Science
- Social sciences
- Technology

Why India Database?

- The India Database contains over 400 scholarly, current, full-text journals.
- All journals are published in the region by academic institutions and scholarly publishers.
- A truly multidisciplinary database, it covers the most important subjects for study and research in the region, published by scholars working in local higher educational institutions.
- This database simplifies the research process for students and researchers by bringing this valuable local content together in one database, giving them one place to find the latest scholarship in their region.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Adviso*r Readers' Choice Awards.

Latin America & Iberia Database

Important regional scholarship

FOR RESEARCHERS IN Latin America, Spain and Portugal—or area studies researchers—who need to keep up with latest scholarship in the regions, the Latin America & Iberia Database provides the current full text of over 550 scholarly journals, providing access to locally published resources without the need to search multiple resources.

Local content is highly valued by researchers, making local scholarly journals some of the most used publications in the library. The Latin America & Iberia Database features ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in Latin American countries, including Argentina, Brazil, Chile, Colombia, Ecuador, Mexico, Nicaragua, Peru, Uruguay, and Venezuela, and also Spain and Portugal.

Major subject areas of study are represented, including business, science, technology, engineering, medical, social sciences, education, arts, anthropology, law, and humanities.

Subject areas include:

- Arts
- Business and economics
- Education
- History

- Humanities
- Law
- Literature
- Medical

- Psychology
- Science
- Social sciences
- Technology

Why Latin America & Iberia Database?

- The Latin America & Iberia Database contains over 550 scholarly, current, full-text journals.
- All journals are published in the region by academic institutions and scholarly publishers.
- A truly multidisciplinary database, it covers the most important subjects for study and research in the region, published by scholars working in local higher educational institutions.
- This database simplifies the research process for students and researchers by bringing this valuable local content together in one database, giving them one place to find the latest scholarship in their region.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

Middle East & Africa Database
Important regional scholarship

FOR RESEARCHERS IN Africa and the Middle East—or area studies researchers—who need to keep up with latest scholarship in the regions, the Middle East & Africa Database provides the current full text of over 320 scholarly journals, providing access to local content without the need to search multiple resources.

Local content is highly valued by researchers, making local scholarly journals some of the most used publications in the library. The Middle East & Africa Database provides ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in the countries of these regions. Major subject areas of study are represented, including business, science, technology, engineering, social sciences, education, and humanities.

Subject areas include:

- Business and economics
- Medical
- Science
- Technology
- Social sciences
- Political science
- Humanities

Why Middle East & Africa Database?

- The Middle East & Africa Database contains over 320 scholarly, current, full-text journals.
- All journals are published in the region by academic institutions and scholarly publishers.
- A truly multidisciplinary database, it covers the most important subjects for study and research in the region, published by scholars working in local higher educational institutions.
- This database simplifies the research process for students and researchers by bringing this valuable local content together in one database, giving them one place to find the latest scholarship in their region.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

Global Newsstream

The most prominent global news content

GLOBAL NEWSSTREAM PROVIDES access to the most influential and respected contemporary news resources from around the globe — from today's news to backfiles dating back to the 1980s. This comprehensive contemporary news collection delivers superior access to current, full-text news sources including newspapers, newswires, news journals, television and radio transcripts, blogs, podcasts, and digital-only websites. There are no paywalls, and most content loads same day — oftentimes by 8 AM U.S. Eastern time.

This "gold standard" contemporary news collection combines ProQuest's U.S. Newsstream, Canadian Newsstream, and International Newsstream into one of the largest collections of news from the U.S., Canada, Europe, Africa, Asia, Latin America, and Australia.

Key U.S. national titles include:

The New York Times (backfile from 1977 forward)
The Wall Street Journal (from 1984 forward)
Washington Post (from 1987 forward)
Los Angeles Times (from 1985 forward)
Chicago Tribune (from 1985 forward)
The Boston Globe (from 1980 forward)

Newsday (from 1995 forward)
The Wall Street Journal Online
ProPublica
Huffington Post
CNN Newswires

Key international titles include:

The Straits Times (backfile from 1995 forward)
The Guardian (backfile from 1996 forward)
Financial Times (backfile from 1996 forward)
The Globe and Mail (backfile from 1977 forward)
The Age (backfile from 1996 forward)

El Mundo (backfile from 2008 forward)
Toronto Star (backfile from 1985 forward)
South China Morning Post (backfile from 1993 forward)
Asian Wall Street Journal (backfile from 1985 forward)

Why Global Newsstream?

- **Best resource for U.S. and international major news titles and resources:** Global Newsstream offers superior access to current, full-text newspapers with longer backfile and/or more timely access to *The New York Times*, *The Wall Street Journal*, *Washington Post*, *Chicago Tribune*, *The Boston Globe, Newsday,* and *Los Angeles Times* as well as over 80 Gannett regional and local titles. In addition, Global Newsstream content also includes newswires, news journals, television and radio transcripts, blogs, podcasts, and digital-only websites. All content can be searched together or separately for maximum researcher efficiency. ProQuest offers flexible subscription options for many premier titles or Newsstream collections within Global Newsstream, as well.

- **One of the most requested resources for research:** In recent analyses of overall usage and retrievals, News content is the second-most retrieved type for researchers on the ProQuest platform. With Global Newsstream, researchers have access to thousands of full-text primary source news sources.

- **Cross searchability enhances researcher output:** Fully cross searchable with other essential ProQuest products including the ABI/INFORM Collection, Historical Newspapers, and all other databases an institution accesses via the ProQuest platform, ProQuest has digitized major titles from around the globe from the first issue forward, making them conveniently available through a Historical Newspapers subscription. When combined with Global Newsstream, these sources offer unrivalled coverage from earliest issues to current day.

- **Maximizes researchers' time:** Global Newsstream pairs robust searching features with detailed indexing to help researchers quickly find the news information they need as well as track news events over time or at location of origin. The indexing covers complete bibliographic information including subjects, companies, people, products, and geographic areas so that users have access to not only top news stories but also detailed information on the arts, sports, business, and popular culture. And, workflow tools such as RSS/alerts, text-to-speech capability, cite, share, print, and export help make the research process flexible, thorough, and efficient. Many citation formats are available, and articles can be translated into 13 languages.

ProQuest News subscription products

The Global Newsstream contains databases and Collections covering all major disciplines. Each discipline-specific Collection is composed of both full text and A&I databases.

Career & Technical Education Database
The definitive source for vocational information

WITH THE CURRENT state of the economy, demand for career advice and vocational information is at an all-time high. The Career & Technical Education Database was created to help meet the need for a wide range of demands for industry knowledge, career advice, and tools and resources for landing a job. Many library patrons want to look into new career paths to explore.

The Career & Technical Education Database is a growing resource that provides helpful full-text content for students preparing their resumes and honing their interviewing skills. Students and job seekers will also find valuable journals covering their industries plus content from full-text magazines, trade publications, as well as ebooks and blogs.

Featuring over 500 full-text publications and valuable career resources, the Career & Technical Education Database offers comprehensive trade and industry information to help meet career and job seekers' needs.

Subjects covered include:

- Accounting
- Auto mechanics
- Building trades
- Computing science
- Graphic design
- Healthcare
- Photography
- Sales and retail

Why Career & Technical Education Database?

- **Excellent Coverage on the Latest Subjects:** Access to highly sought trade publications such as *Marketing, Journal of Nursing Education, Physical Therapy, Logistics Today, Accounting Horizons,* and *Agricultural Research*. Valuable vocational publications also provide users with highly sought, occupation-focused titles such as *Marketing Week, Aviation Week & Space Technology, Broadcasting & Cable, Nursing, Law & Order, Chemist & Druggist, Electronic Engineering Times,* and many more.

- **Very broad career subject coverage:** education, nursing, IT, criminal justice, engineering, business, and public health.

- **Ebooks now available:** Patrons seeking career advice will receive full-text access to helpful titles such as *Winning Interviews for First-Time Job Hunters* and *Cool Careers For Dummies*; plus, over 30 other ebooks are available, such as *Winning Strategies for First-Time Job Hunters and 175 High-Impact Resumes*, with even more to be added.

- **New Full-text Blogs:** Blogs are another great way for users to access the latest in career advice and industry trends. These publications deliver results with truly unique market insights. Popular blogs such as *The Monster Blog, Seth Godin's Blog, Training Day,* and many more add fantastic value to this collection.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

Canadian Business & Current Affairs (CBCA) Database

Canada's most comprehensive and diverse full-text database

CANADIAN BUSINESS & CURRENT Affairs (CBCA) Database is Canada's most comprehensive and diverse full-text online database combining CBCA Business, CBCA Education, and CBCA Reference & Current Events. With high-quality indexing for over 1,800 publications, CBCA Database provides more than 700 publications in full text with over 300 with ongoing full text. Broad coverage from a Canadian perspective spans agriculture, business and economics, education, government and politics, health sciences, history, literature, medical sciences, social sciences, and many more subject areas.

Scholarly journals are a core full-text resource within CBCA Database, with an array of Canadian publishers and subject coverage from arts to women's studies. Sixteen law journals, 27 education journals from teacher associations, professional organizations, and education departments, history journals, technical and applied sciences from Canadian institutes, sciences and technology publications as well as ongoing news transcripts from CBC and CTV are included.

Subject areas include:

- Agriculture
- Business and economics
- Education
- Government and politics
- Health sciences
- History
- Literature
- Medical sciences
- Social sciences

Why Canadian Business & Current Affairs Database?

- Over 900 publications from Canada
- More than 570 scholarly journals
- Over 30 newspapers and important news wire feeds (adding ProQuest's Canadian Newsstream gives the most comprehensive coverage)
- Scholarly journals with coverage in all major subjects
- A diverse mix of professional and current events trade journals and magazines
- Well-known CBC programs such as *Sunday Night, Decouverte, La Facture, Le Telejournal, Fifth Estate,* and *The National* are included with over 300,000 transcripts from 1982 to current.
- Balanced coverage of the most studied and requested subjects
- Diverse content: journals, magazines, newspapers, books, television transcripts, and dissertations
- Cross searchable with other ProQuest databases, such as Canadian Newsstream
- New content added daily and new titles are licensed continually.
- Specialized vocabulary and indexing

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

Statistical Insight Collection

Statistical tables and reports on thousands of different topics

FOR BUSINESS AND social science students and researchers needing national and subnational information to identify and understand trends in the U.S., the Statistical Insight Collection is a comprehensive portal that provides fast and easy access to more than 1 million tables and millions of full-text reports on thousands of topics all in one place. ProQuest's Statistical Insight Collection brings all of this information together in one place with great depth and breadth of coverage to support multidisciplinary research.

Whether users are looking for tables, statistical reports, or publication abstracts, results are ranked by relevance. Faceted search results can then be filtered by document type, source, date published, geographic area, and more. Coverage includes a wide range of topics allowing access to billions of authoritative and comprehensive data points for use in professional research, student projects, and more.

Subject areas include:

- Interdisciplinary
- Business
- Economic
- Social science
- Public policy
- Sociology

The Statistical Insight Collection allows users to go straight to the tables or easily find the right publication with the right tables. Every table is linked to an abstract, which contains a link back to the full-text source document for context. Coverage includes a wide range of topics allowing access to billions of authoritative and comprehensive data points for use in professional research, student projects, and more. The Statistical Insight Collection enhances studies in social science research and policy, where statistics are the foundation, and covers more than 160 subject areas including business, education, psychology, and health-related topics.

The Statistical Insight Collection offers:

- Deep abstracts and indexing archive of statistical reports since 1973, providing longitudinal access to statistical information with tables covering decades and, in some instances, centuries of data
- Consolidated access to federal, state, intergovernmental organization, and nongovernmental organization entity statistical information
- Indexing focus on statistical breakdowns
- Content from government, research, and corporate sources
- Licensed content not found on the open web
- Table-level retrieval through detailed metadata

The Statistical Insight Collection has three key components that may be purchased separately: A&I (Statistical Insight Abstracts), tables (Statistical Insight Tables), and full text and tables (Statistical Insight Database). The A&I file starts in the 1970s and continues through the present. Full text and tables began in 1999, though their extensive coverage starts in 2007 through the present.

Statistical Abstracts Collection

Compendia from more than 60 countries and international government organizations, with access to thousands of socioeconomic tables

THE STATISTICAL ABSTRACTS Collection provides the only aggregated databases of general reference statistics for more than 60 countries and international government organizations, on a single platform, with an easy-to-use interface, and content that is accessible in a single format in a single language. It provides access to subnational data for cities, provinces, counties, and other international regions where available, along with the ability to download tables to manipulate the data.

The collection is an excellent resource for business, social science, economics, and government researchers to find "what" data is being collected as well as the original sources as they look to gather and create their own datasets. Additionally, it is an excellent resource for K-12 students as they learn about statistics, serving as a great starting point for exploring and collecting data for their assignments and research.

The Statistical Abstracts Collection includes the Statistical Abstract of the United States, now published by ProQuest, and the Statistical Abstracts of the World. It covers compendia from more than 60 countries and international government organizations. All tables are available for download, and English translations are provided where needed, making this one of the most accessible statistical resources for all researchers.

The Statistical Abstracts Collection provides rich insight into everyday life, social conditions, economics and trade, and more. This collection is an abundant starting point for interdisciplinary research, from simple class assignments to complex research projects, and serves as an outstanding resource for researchers in business, social science, economics, and government.

Subject areas include:

- Interdisciplinary
- Business

- Economics
- Public policy

- Sociology

The Statistical Abstracts Collection offers:

- 50,000+ downloadable tables, all available with English translations where needed.
- Search and browse functionality, allowing users to quickly scan through tables in search results or browse through each compendium like a book using its original table of contents.
- An easy-to-use interface that allows users to preview tables.
- Users can easily share the table docview page via an email that includes a GIF image of the table, links to the table and data source.
- Online tables are expanded to contain more data than the abridged print versions.
- The collection contains significant longitudinal data, from the oldest data in Statistical Abstracts of the World that goes back to 1527 to content from the 1700s.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor* Readers' Choice Awards.

Statistical Premium Collection

Best socioeconomic statistics, reports, and data for researchers in the social sciences, business and economics

FOR BUSINESS, SOCIAL SCIENCE, and interdisciplinary students and researchers needing national and sub-national information to identify and understand trends in the U.S., the Statistical Premium Collection is a comprehensive collection of databases that provide fast and easy access to more than 1 million tables, over 100,000 datasets, and billions of facts and full-text reports on thousands of topics all in one place. The Statistical Premium Collection brings all of this information together, providing both an archive of data and reports and forecasts, with a greater depth and breadth of coverage to support multidisciplinary research.

The Statistical Premium Collection is built to find statistics and data and presents the best socioeconomic statistics, reports, and data available for researchers in the social sciences, business and economics. It features:

- **The long-standing Statistical Insight Collection**, which contains more than 1 million tables and millions of full-text reports on social, economic, and policy issues
- **International Datasets,** which brings together complex and diverse data from country forecasts to socioeconomic conditions from hundreds of sources, in one place and one format, enabling billions of data points and time series to be searched, compared, visualized, and shared
- **The Statistical Abstracts Collection,** which is comprised of the award-winning Statistical Abstract of the United States and Statistical Abstracts of the World providing insight into over 60 countries as well as data from key International government organizations.

Subject areas include:

- Interdisciplinary
- Business
- Economics
- Social science
- Public policy
- Sociology

The Statistical Premium Collection offers:

- Deep abstracts and indexing archive of statistical reports provides longitudinal access to statistical information with tables covering decades and in some instance centuries of data
- Consolidated access to federal, state, intergovernmental organization, and nongovernmental organization statistical reports and datasets
- Indexing focus on statistical breakdowns
- Covers content from government, research, and corporate sources
- Offers licensed content not found on the open web
- Provides consistent bibliographic data
- Identifies sources of statistics and data
- Includes multinational, national, and hard-to-find sub-national data

International Datasets

Unique, highly-sought after international and difficult-to-find subnational data

INTERNATIONAL DATASETS BRINGS together global, national, and difficult-to-find subnational data in a single platform, complete with powerful visualization tools, the ability to download the datasets for use offline including the ability to generate the R Console code and share datasets with others. Unlike competing products, the database has a unique focus on international data and is an outstanding resource to support research in business, economics, social sciences, and multidisciplinary projects.

International Datasets brings complex and diverse data together from hundreds of sources in one place and one format, enabling billions of data points and time series to be searched, compared, visualized, and shared. The product provides content selected by ProQuest's statistical data experts, including data from international governmental organizations (IGOs), in-country data from governmental statistical offices around the world, as well as data from private sources, such as exclusive data from Oxford Economics' renowned array of quantitative and qualitative research and Datamyne's country trade and import/export data.

The platform's ease of use adds immense value to its highly sought after content. A user can easily browse and search a wide variety of data easily including hard-to-find subnational datasets in a single platform. Data can be presented in many different chart types, including choropleth maps, making it easy to visualize data and compare datasets between countries and sub-national regions. Data can be exported and shared, making it easy for research teams to use and to aid work on multidisciplinary research projects. Users can also upload their own data and compare it to datasets within the product, as well as create their own topic pages or datasheets from as many different datasets as they like to help manage and organization their work.

Why International Datasets?

- Ease of use. A user can easily browse and search a wide variety of data easily including hard-to-find sub-national datasets in a single platform.
- Data can be presented in many different chart types, including choropleth maps, making data visualization easy.
- The platform provides the ability to easily compare data for countries, as well as dataset topics.
- Data can be exported and shared, making it easy for research teams to use and to aid work on multidisciplinary research projects.
- The platform provides a single platform for analysis, offering the ability to upload your own data and to compare it to datasets within the product.
- Users can create their own topic pages or datasheets from as many different datasets as they like to help manage and organization their work.

> *"…a wealth of datasets generated by governments, international organizations, and research firms. Users are able to browse global, regional, and national-level statistical data organized into 14 broad subject headings… Summing Up: Recommended. All academic levels; general readers; professionals/practitioners."* CHOICE Reviews Online: Internet Newsletter February 2016
